

LIFE, THE UNIVERSE AND EVERYTHING

This course takes its title from, and makes some reference to, *The Hitchhiker's Guide to the Galaxy*. As usual for the bookshop courses, the course is in two parts. The first part is called 'Life and the Universe'. That part treats these topics: philosophy's relation to science; God; the idea of the universe; death; and the meaning of life. The second part is called '. . . and everything'. That section of the course covers: the relation between mind and body; the concept of identity; 'the metaphysics of morals'; so-called philosophical idealism; and theories of truth.
